Class Tools

SLO: Assess how technology is used to support writing and reading. Develop critical thinking skills.

To be an effective teacher, tools to help students learn content is important and in some cases critical. Technology can be that tool. Reading or writing, organization, sharing, or praising your students, learning tools make learning fun!

For this assignment, explore www.claasstools.net. After reviewing the lectures and content found in this unit, assess the site and the many different tools available. Identify tools that will specifically provide support for reading and writing.

Next, select four (4) books that are appropriate for the age and grade you plan to teach. Select four (4) different tools to use, two (2) for reading and two (2) for writing. Now, create the supports or tools you would use, using your selected books for reading and writing. In addition, use Serravallo, (2015, 2017) as a resource to construct your supports. Once you construct your tools, write a one-paragraph assessment of the tool and your plan for classroom use, along with the URL of your created support.

There are four submission locations in the unit. Make sure to submit one to each location.

Submit to the appropriate locations in the unit.
